

WARRI LADIES VANGUARD NORTH AMERICAN BRANCH

A TRAINING TESTIMONIAL

This is a report on the training I received, as a trainee in the Multipurpose Youth Training Centre (MPYTC), Egbokodo, Warri, Delta State, Nigeria under the sponsorship of the Warri Ladies Vanguard, North American Branch. This lasted from June 2024 through October 2024.

HOW I FELT WHEN I WAS CHOSEN FOR THE PROGRAM

When I was given the prestigious honour of being chosen as one of the participants to be a part of Cohort 2 for the 2024 Vocational Training being sponsored by the Warri Ladies Vanguard, North American Branch, I was super elated, so excited, and overjoyed! I thanked God for counting me worthy of being among the selected few to undergo this all important training and I promised myself to make the best out of it. In the spirit of the excitement, I called my family members and friends, informing them of the awesome news and they all rejoiced with me.

WILL WHAT I HAVE LEARNT BE USEFUL AFTER GRADUATION IN JANUARY?

Of course yes! The world right now is a global village and this training is very timely. All I have learnt during this training which ranges from Microsoft Word, Microsoft Excel, Microsoft Power Point and Corel Draw will be very useful to me, even after graduation. I hope to be able to put all I have learnt into practice, so as to generate useful income.

MY PLANS AFTER GRADUATION

As graduation draws near, my plans become clearer. The following are my plans for graduation by the grace of God.

1. I hope to set up an IT Centre at the location where I am based, as there is none in my vicinity right now. This will enable me to prepare documents for clients/customers and print these documents, thereby generating income when they pay for the services rendered.

2. As the saying goes, “*learning never ends*”, hence, I wish to continue learning to sharpen my skills and acquire new skills (particularly IT skills). This will be done virtually, using the various free and paid courses available on the digital space.
3. Expansion of the IT Centre as time progresses which would not only include equipping it with more sophisticated devices but introducing taught courses at specified low budget fees, hence, generating more income and in turn, impacting more knowledge to people.
4. Getting a remote job, hopefully international, after the more Tech skills have been gained.
5. I also wish to be able to give back to the society, especially to those of the Itsekiri origin, as I have graciously received from the Warri Ladies Vanguard, North American Branch.

CONCLUSION

In conclusion, I would once again want to use this medium to thank God Almighty and the entire Warri Ladies Vanguard, North American Branch, for the opportunity to expand my knowledge base. May God bless you all super abundantly and grant you your heart desires according to his riches in glory. Amen.
